

News from Trepak straight to your inbox, March 2026.

A flying start to 2026

The new year has truly had a flying start! 🚀 Several new production lines, including fillers and cappers, have been delivered to various customers. After installation, approved SAT, and training, the new lines have provided our customers with significantly increased production capacity. These have been very enjoyable projects, and both our customers and the Trepak team are pleased.

Read below what Christian Stenberg, Production Manager at NFT – Nordic Formulation Technology A/S, a company within [Bjørn Thorsen](#) – has to say about working with us. 🤝 👤

More lines are already underway, as we have been entrusted by even more new customers, both large and small, to help them optimize their production. Exciting and rewarding!

From all of us to all of you, have a wonderful spring, and we'll be in touch again soon! Don't hesitate to contact us if you have any questions about how we can support you with your production.

Take care, everyone.

Line delivery in the NFT project

Last week, we delivered a truly exciting project together with Nordic Formulation Technology, a company within [Bjørn Thorsen](#) – a collaboration that has worked exceptionally well from start to finish. 🤝

Together with [ACT Logmark AB - Smart produktmärkning för modern tillverkningsindustri](#), we delivered a complete machine line that is now up and running in NFT's new production facility in Svendborg.

We asked Christian Stenberg, Production Manager at NFT, about his experience working with us:

Why did you choose Trepak as a partner?

- From the very beginning, Trepak stood out as more than just a machine supplier. They took the time to understand our production, our ambitions, and the challenges we wanted to solve. Their expertise and collaborative approach made it clear that they could deliver a solution tailored to our needs – and be a true partner throughout the entire project.

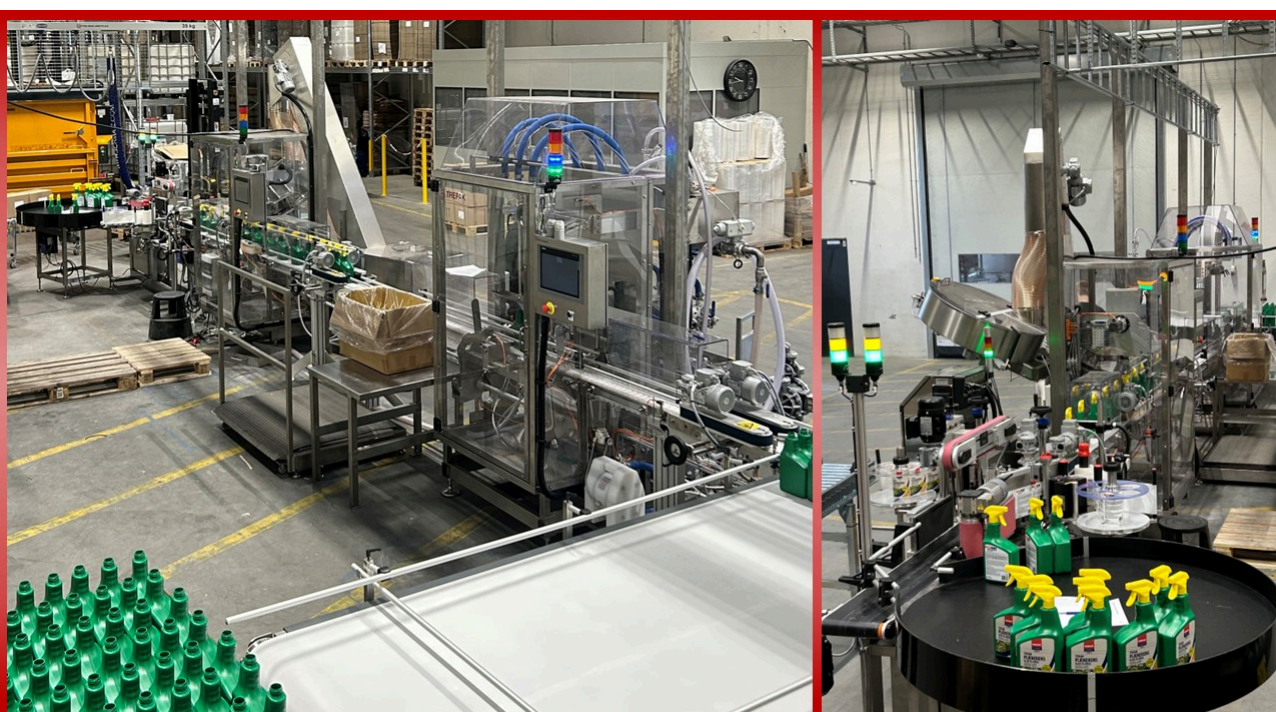

What do you appreciate most about working with Trepak?

- What we value most are the people and how the collaboration was handled. From the initial meetings to the final installation, Trepak's team created a structured and transparent process that gave us confidence at every step. Their professionalism, responsiveness, and solution-oriented mindset made what could have been a complex project feel smooth and well-organized.

What difference has the collaboration made for Nordic Formulation Technology?

- The impact has been significant. With the new filling line, we've been able to double our production capacity while maintaining stable and reliable operations. It has strengthened our capabilities and provided a solid foundation for future growth, enabling us to meet increasing demand from our customers.

🌟 We at Trepak would like to extend a big thank you to Nordic Formulation Technology for their trust – and to Logmark for an excellent collaboration throughout the project. 🌟

We are ramping up with new staff

🌟 **We are delighted to share that we've strengthened our automation department** – the team responsible for, among other things, our well-designed and user-friendly HMI panels, which we are very proud of. **Robin Pettersson** joined us at the beginning of February and quickly found his place in the team. He has already become a highly appreciated colleague and has settled into the work on several fronts. A warm welcome once again, Robin! 🤝

Our collaboration with Malmö University has also kicked off, with a group of thesis students who will focus on developing solutions across various projects. This is incredibly exciting, and we look forward to a rewarding period together with these young technology talents. Welcome! 🤝

And that's not all – we've also welcomed two students doing their LIA (Learning in the Workplace) with us in automation and mechanics. This is greatly appreciated, fun, and inspiring for all of us. Welcome to the team! 🤝

Don't forget that...

If you have thoughts, questions, or simply want to bounce ideas with a trusted partner, don't hesitate to contact us. Our exceptional team is here for you. We'd be happy to discuss how we can help optimize your production. You'll find our contact details at the bottom of this newsletter.

If you need a new service agreement or support for your existing machine or production line, please reach out to [Joakim](#) or [Kristoffer](#) in our sales team. They're your go-to contacts who can help determine exactly what your specific machinery requires, prepare the right agreement, and schedule service and support at times that work for you and your production. After that, our highly skilled service team - expanded last summer and led by [Dan and Don](#) - will visit your factory to perform the requested work and can also provide on-site tips and recommendations to make your production even better.

We're a development-driven company, and our machines and lines are custom-built to meet each customer's specific needs. We manufacture (the machines on-site in Malmö, thoroughly test them both here and at the customer's location after installation (FAT and SAT), and provide all the necessary documentation.
